...we're keeping her that way

welcome

It's tricky improving on something that's already certified against one of the world's highest standards in Quality and Care. Fortunately we do tricky pretty well.

Our entire Mother & Baby range is made without the usual list of suspect ingredients, and chemical accomplices, making PURBabies one of the purest and gentlest in the world. Not a bad trick to start.

But our dream is to help turn our family of customers, suppliers, and staff into the cleanest, and greenest around. So we've decided to make Soil Association Certification the *absolute minimum* standard for everything we do.

This means you'll never see a PURBabies product that doesn't carry the association stamp of approval.

values

You'll find a few other companies out there who share a similar pride to us in what they put in and *leave out* of their Mother & Baby products, and how they conduct their business. Sadly you'll find many more that don't.

Fortunately if you're reading this there's a good chance that you know the difference and you're already on the very crowded road to making the right choice.

A range for everything from mum's tums to baby's bums

PURbabies

The word Pur (pronounced 'peer') is the Welsh word for pure, and its use in naming our products commits us to a promise of uncompromising quality, purity and responsibility, not just to our customers and trade partners but also to the sustainability of our natural environment.

We think the best way to stick to our promise is not to over commit ourselves or our resources. We sell our products all over the world but like any child we're not trying to grow too quickly (we'd rather avoid the pain). So throughout each year we look to add just a select number of UK retailers to our list. So if you've received this catalogue directly from us there's a chance that we've got a little room left and we'd love to see you join us.

A note about PUR Babies Samples

Providing samples to trade customers without increasing the size of our own carbon footprint through packaging, waste and transport is a tricky business. As our company has grown, so has the volume of samples we send worldwide. In order to offset the environmental impact we have introduced a policy of charging a nominal fee for samples sent **outside the UK** (it's actually the trade list price) which is paid back to trade customers whose orders are above a certain size (£500 ex. Vat). This fee is then used as investment into genuine carbon offset initiatives to help decrease the impact to the beautiful environment on which our business relies. We thank all customers for their understanding in this important endeavour.
